

APPENDIX A
PROPOSED COUNT

A reciprocating saw comprising:

a reciprocatable spindle for supporting a saw blade for reciprocating sawing movement;

a body defining a longitudinal pivot axis and housing a motor and a drive mechanism driven by the motor, the drive mechanism selectively driving the spindle, the body having a forward end supporting the spindle and a rearward end; and

a grip engageable by a hand of an operator, the grip being connected to the rearward end of the body for pivoting movement relative to the body about the pivot axis.
